

Winter gathering: nature-inclusive education

On 3 February, from 17:00 to 20:00, we are coming together with the Esprit Sustainability Teachers Network at Cartesius Lyceum. This gathering will focus on nature-inclusive education, featuring a workshop led by Merel Collenteur. Merel is a biologist, outdoor coach, and specialist in regenerative and nature-inclusive education. As always, we will share a meal together, and there will be plenty of space for your own questions and for exchanging ideas and experiences.

You can register via the invitation in your calendar. Will you join us?

Merel Collenteur

How can I be a good ancestor? Together with students and schools, I work to bring this question back to the heart of our society. I believe that learning, living, and working in alignment with the principles of nature offers powerful answers to many of the challenges we face today. Children and young people continually inspire me. I value learning with them and from them. Younger generations deserve a strong voice, because the future we are shaping is theirs as well. Together, we can help build a regenerative society for generations to come.

Sustainability Calendar Jan - Apr

Date	Event	Description
19 January	Start Philosophy Course: Animals, Nature, and Humans	This (Dutch) course explores philosophical perspectives on humans, animals, and nature. It is taught by Joan de Ruijter and consists of ten free online sessions on Monday evenings.
27 January	Eco vision day	Bring your students to this day, organized by students from the Eco Team at AICS.
3 February	Winter Gathering Sustainability Teachers Network	Outdoor education workshop led by Merel Collenteur, a shared meal and time for exchange.

Podcast Outdoor Learning with Felix and Merel

Want a sneak peek? Listen to this (Dutch) podcast episode, where our colleague Felix Spee talks with Merel Collenteur about nature-inclusive education, outdoor learning, and practical tips for teachers who want to take their lessons outside.
